VEROO

BEING A
LEAD PLATFORM ENGINEER

M/F/D | WIENER NEUDORF | FULL TIME (40 H/WEEK)

At VEROO, we passionately work every day serving our purpose – shaping integrated and predictable logistics to enable smart transportation and delivery of goods. We see customers struggling across their supply chains due to a lack of predictability, accurate data, and integrated systems. To overcome these challenges, we support them by digitizing their transport and logistics processes with a strong focus on transport visibility. VEROO is part of the WALTER GROUP, enabling us to combine long-standing industry expertise with agility and innovation. If you are someone who likes to work in a start-up minded team that moves fast to create impact but still wants to benefit from the access to a corporate industry leader, VEROO is the place for you. We are now keen to expand our core team with this key role and invite you to shape the digital future of transport and logistics with us.
Job vision.

We welcome you in a setup being **solely public cloud native** (GCP, Atlassian, Github, Auth0 etc.), that leverages managed services at maximum, stand on the shoulders of giants and pushes operational burden to a bare minimum. Today we successfully established a first generation of business products provided as cloud services per M2M API's and WebUI's to our customers - built as component based, self-contained and autonomous domain systems.

Having a solid understanding about Domain **Driven Design (DDD)** and **Team Topologies (TP)** principles, you feel heavily attracted by principles of NoOps, GitOps, DevOps, DevSecOps, FinOps as well as Continuous Delivery, Continuous Deployment, Site Reliability Engineering and Objective Key Results. You feel excited and attracted when taking a look at roles like Cloud Architect, Cloud Developer, Data Engineer, Cloud DevOps Engineer, Cloud Security Engineer, Cloud Network Engineer, Collaboration Engineer, etc.? With you as the **first inhouse lead engineer** we would love you to set the basestone for VEROO's "Cloud Center of Excellence". Entering the company, you will focus on the practical side of our cloud setup being executed by our existing teams. On the one hand you will dig in and oversee all existing practices they execute, while continuously surveilling, improving and evolving these practices together with other key players of VEROO. You will call the base platform team your home base but will collaborate with support

stream aligned teams as well as complicated subsystem teams in chapter functions. You'll intensively collaborate and communicate with our delivery leads, principal architect, members of the architecture-chapter, head of technology & engineering as well as contractor companies that provide us certified senior-level consultants and engineers who you can delegate workload execution and proposal delivery to. Your role's success is seen in contributing and ensuring that we sweet-spot a company wide well followed, lean, secure, reliable, scalable, efficient and effective, performant and low-latency technical platform architecture strategy and governance. All that while the teams thrive in their local domain autonomy and authority, serving continuous flow and constant high pace of genuine business value - so we master constant change, growth and a manageable spectrum of 'variety' together.

We are proud of the solid initial maturity levels reached so far and won first long term customer relationships. Nevertheless, we need to evolve our practices and increase our maturity level. We already started transitioning from POC level towards production level but want to fiercely increase momentum.

Are you ready to enter us in an early phase of successful "exploratory drilling"? Do you want to prepare us to be ready to "stand the pressure" and "fill barrels" as we prepare to digitally "hit oil" soon? **Then continue reading.**

Your profile.

→ Completed Bachelor's or Master's degree with an IT focus is a strong plus
→ 5+ years of experience in cloud computing (applications, infrastructure, storage, platforms and data), as well as cloud market and competitive dynamics.
→ Experience in building cloud native setups compliant and certified toward GDPR, ISO/IEC 27001 and SOC 2 on-top of one of the major hyperscalers: GCP, AWS or Azure; ideally GCP
→ Corporate to Enterprise Level Experience in Google SRE practises
→ Experience in chaos engineering practises, e.g. Netflix chaos monkey
→ Collaborate with a 24/7 dedicated security surveillance and IR team - we do not want you to do 24/7 ops; but rather collaborate with these teams during regular business hours

GENERAL MUST

→ Multiple years of experience as Developer and Solution Architect in a corporate to enterprise DevOps team setup driven by principles described in the introduction
→ Rock-solid practitioner in Git, Terraform and CI/CD pipelines
→ Experience with application, data and technology architecture design relating to solving business issues
→ Experience in network infrastructure, security, and application development
→ Ability to deliver results and work cross-functionally to orchestrate solutions

→ Ability to learn and work with new emerging technologies, methodologies and solutions in the Cloud/IT tech space
→ Ability to motivate and reach various audiences and strong communication skills
→ Experienced in agile software development methodologies (Scrum, Kanban, XP, Lean) as well as moderating technology related workshops and refinements based on agile principles
→ You are fluent in German and English

Your benefits.

→ Self-determined, independent work and opportunity to quickly take on responsibilities
→ Possibility to actively shape our products and company into something bigger
→ Work in a startup-minded team with the resource continuity of a long lasting corporate
→ Modern working environment in Wiener Neudorf (on the southern outskirts of Vienna), free shuttle service from Vienna plus the option to work from home
→ Numerous social benefits (employee restaurant, support for lunch, in-house pub / lounge, free parking, extensive sports facilities, numerous employee events, language courses, support in finding accommodation during relocation and more)
→ Annual gross salary between 60,000 and 80,000 € (all-in) paid out 14x per year, based on qualifications and previous experience with optional bonus clause

Don't back off if you do not fulfill all requirements perfectly and have some gaps. If you see yourself as a high potential, have the teeth to sail in and close the gaps and evolve together quickly with our mutual support. **We'd like to meet you.**

Apply now.

VEROO warmly welcomes all people regardless of age, skin color, gender, sexual orientation and cultural background and celebrates diversity. We are looking forward to your email application via **career@veroo.io**. If you have any questions, please do not hesitate to contact our recruiter Gabriele Vollnhofer via vollnhofer@veroo.io.
